*Recommended by the Academic Council of Bogomolets
National Medical University as a textbook for students
of higher medical education establishments
(minutes No. 13, 25 May 2017)*

Authors:

V.O. Kalibabchuk, V.V. Ohurtsov, V.I. Halynska, V.B. Yemelianov,
H.M. Zaitseva, O.V. Klenina, O.I. Marshalok, Ya.M. Pushkarova, V.L. Slipchuk,
I.H. Teleheiev, O.M. Roman, L.V. Filippova

Reviewers:

I.O. Frytskyi — Doctor of Chemical Sciences, Professor, Head of the Department of Physical Chemistry of Taras Shevchenko National University of Kyiv;

H.O. Syrova — Doctor of Pharmaceutical Sciences, Professor, Head of the Department of Medical and Bioorganic Chemistry of Kharkiv National Medical University;

O.Yu. Konovalova — Doctor of Pharmaceutical Sciences, Professor, Head of the Department of Pharmaceutical and Biological Chemistry, Pharmacognosy of the Private Higher Education Establishment “Kyiv Medical University”

**General and Inorganic Chemistry : textbook / V.O. Kalibabchuk,
G54 V.V. Ohurtsov, V.I. Halynska et al. ; edited by V.O. Kalibabchuk. —
Kyiv : AUS Medicine Publishing, 2019. — 456 p.
ISBN 978-617-505-657-8**

The textbook briefly reviews the basic concepts and laws of chemistry, the structure of substances, their properties, the energy and kinetics of chemical reactions. On the basis of this material, the properties of solutions and regularities of the processes occurring in them are presented. The textbook describes the properties of chemical elements, their simple and complex substances, the biological role and application in medicine.

The textbook is intended for students of higher pharmaceutical education establishments and pharmaceutical faculties of higher medical education establishments.

CONTENTS

CONTENTS

Preface.....	8
Part One. GENERAL CHEMISTRY.....	10
Chapter 1. Fundamentals of atomic and molecular theory. Basic laws of chemistry... 10	10
1.1. Basic concepts and quantities of atomic and molecular theory.....	10
1.2. Basic laws of chemistry.....	16
1.3. Calculations based on chemical equations.....	24
1.4. Ionic reaction equations.....	26
Chapter 2. Structure of atoms.....	29
2.1. From the history of the modern theory of atomic structure.....	29
2.2. The wave motion of the electron.....	31
2.3. Quantum numbers.....	33
2.4. Electron configurations (electronic structural formulas) of atoms.....	37
2.5. The Periodic law and the Periodic table of chemical elements in the light of the quantum mechanical model of the atom.....	43
Chapter 3. Chemical bonding. Molecular structure.....	46
3.1. Modern theory of chemical bonding and its basic concepts.....	46
3.2. Valence bond theory.....	47
3.3. Molecular orbital theory.....	63
3.4. Intermolecular interactions. Hydrogen bond.....	71
Chapter 4. Coordination compounds.....	75
4.1. Basic concepts of coordination chemistry. General principles of the structure of coordination compounds.....	75
4.2. Classification of coordination compounds.....	81
4.3. Isomerism of coordination compounds.....	85
4.4. Nomenclature of coordination compounds.....	89
4.5. Chemical bonding in complexes.....	90
4.5.1. Valence bond theory.....	90
4.5.2. Crystal field theory.....	93
Chapter 5. Oxidation–reduction reactions.....	97
5.1. Characteristics of redox reactions.....	97
5.2. Basic concepts of oxidation and reduction.....	98
5.3. Typical oxidants and reductants.....	100
5.4. Basic rules for writing equations for redox reactions.....	101
5.5. Classification of redox reactions.....	116
5.6. Determination of chemical equivalents of oxidising and reducing agents.....	119
Chapter 6. Classes of inorganic compounds.....	126
6.1. Oxides.....	128
6.1.1. Ways of oxide preparation.....	131
6.1.2. Chemical properties of oxides.....	132
6.1.2.1. Basic oxides.....	132
6.1.2.2. Acidic oxides.....	135
6.1.2.3. Amphoteric oxides.....	138

CONTENTS

6.2. Oxide hydrates.....	140
6.2.1. Bases.....	140
6.2.1.1. Ways of hydroxide preparation.....	141
6.2.1.2. Chemical properties of hydroxides.....	141
6.2.2. Acids.....	143
6.2.2.1. Ways of acid preparation.....	146
6.2.2.2. Chemical properties of acids.....	147
6.2.3. Amphoteric hydroxides.....	151
6.2.3.1. Ways of amphoteric hydroxide preparation.....	151
6.2.3.2. Chemical properties of amphoteric hydroxides.....	152
6.3. Salts.....	153
6.3.1. Neutral salts.....	154
6.3.1.1. Ways of neutral salt preparation.....	154
6.3.1.2. Chemical properties of neutral salts.....	156
6.3.2. Acidic salts.....	158
6.3.2.1. Ways of acidic salt preparation.....	158
6.3.2.2. Chemical properties of acidic salts.....	159
6.3.3. Basic salts.....	161
6.3.3.1. Ways of basic salt preparation.....	161
6.3.3.2. Chemical properties of basic salts.....	161
6.4. Relationship of the main classes of inorganic compounds.....	163
6.5. Biological role and medical use of some classes of inorganic compounds.....	165
Chapter 7. Chemical thermodynamics.....	167
7.1. Basic concepts of thermodynamics.....	167
7.2. Thermodynamic systems. Thermodynamic functions.....	167
7.3. The first law of thermodynamics.....	169
7.4. Heat of chemical reactions.....	171
7.5. Thermochemistry laws.....	172
7.6. Application of thermochemical calculations for the description of biochemical process energy.....	175
7.7. The second law of thermodynamics.....	177
7.8. Gibbs equation.....	179
Chapter 8. Chemical kinetics. Chemical equilibrium.....	183
8.1. Rate of chemical reactions.....	183
8.2. Dependence of reaction rate on reactant concentrations.....	183
8.3. Molecularity of chemical reactions.....	185
8.4. Classification of complex reactions.....	186
8.5. Effect of temperature on reaction rate.....	188
8.6. Catalysis.....	189
8.7. Chemical equilibrium. Reversible and irreversible reactions.....	190
8.8. Le Chatelier's principle.....	192
Chapter 9. Solutions and their properties.....	196
9.1. Introduction to solutions.....	196
9.2. Solution concentration.....	197
9.3. Enthalpy of solution.....	200
9.4. Factors affecting solubility.....	201
9.4.1. Nature of solute and solvent.....	201
9.4.2. Temperature and pressure.....	201

9.4.3. Distribution of solute between two immiscible solvents	202
9.5. Solutions of electrolytes	203
9.5.1. The main concepts of the electrolytic dissociation theory	203
9.6. Theories of acids and bases	205
9.7. Self-ionisation of water. Hydrolysis of salts	207
9.8. Buffer solutions	211
9.9. Stability of complex compounds	216
9.10. Solubility product	217
9.11. Colligative properties of dilute solutions containing nonvolatile solute	218
9.12. Electrode potentials	222
Part Two. CHEMISTRY OF THE ELEMENTS	229
Chapter 10. Hydrogen, water and hydrogen peroxide	230
10.1. Hydrogen	230
10.1.1. Physical properties and occurrence of hydrogen	230
10.1.2. Methods for preparation of hydrogen	231
10.1.3. Reactions of hydrogen	232
10.1.4. Uses of hydrogen	233
10.2. Water	234
10.2.1. Physical properties and occurrence of water	234
10.2.2. Chemical properties of water	235
10.2.3. Water purification	236
10.3. Hydrogen peroxide	237
10.3.1. Chemical properties of hydrogen peroxide	238
10.3.2. Uses of hydrogen peroxide	239
Chapter 11. Metals	240
11.1. Physical properties of metals	241
11.2. Chemical properties of metals	241
11.3. Electron structure of metals	241
Chapter 12. Group IA. Alkali metals	243
12.1. Physical properties and occurrence of alkali metals	244
12.2. Preparation of group IA elements	245
12.3. Chemical properties of alkali metals	245
12.4. Oxides and hydroxides of alkali metals	246
12.5. Uses of alkali metals	246
Chapter 13. Group IIA. Beryllium, magnesium and alkaline earth metals	249
13.1. Physical properties and occurrence of group IIA metals	250
13.2. Preparation of group IIA elements	251
13.3. Chemical properties of beryllium and its compounds	252
13.4. Chemical properties of magnesium and its compounds	254
13.5. Chemical properties of alkaline earth metals	254
13.6. Oxides and hydroxides of alkaline earth metals	255
13.7. Uses of beryllium, magnesium and alkaline earth metals	256
Chapter 14. Group VIB. Chromium, molybdenum, tungsten	259
14.1. Physical properties and occurrence of group VIB elements	260
14.2. Preparation of group VIB elements	261
14.3. Chemical properties of chromium	261

CONTENTS

14.4. Uses of chromium, molybdenum, tungsten.....	264
Chapter 15. Group VIIB. Manganese, technetium, rhenium	267
15.1. Physical properties and occurrence of group VIIB elements	267
15.2. Preparation of manganese	268
15.3. Chemical properties of manganese.....	269
15.4. Uses of manganese, technetium, rhenium	271
Chapter 16. Group VIIB. Iron, cobalt, nickel and platinum metals.....	274
16.1. Physical properties and occurrence of group VIIB elements.....	275
16.2. Platinum metals	276
16.3. Preparation of group VIIB elements	277
16.4. Chemical properties of iron.....	278
16.5. Chemical properties of cobalt and nickel.....	281
16.6. Chemical properties of platinum metals.....	282
16.7. Uses of group VIIB elements.....	283
Chapter 17. Group IB. Copper, silver and gold	288
17.1. Physical properties and occurrence of group IB elements	288
17.2. Preparation of group IB elements.....	289
17.3. Chemical properties of copper	290
17.4. Chemical properties of silver	292
17.5. Chemical properties of gold	293
17.6. Uses of copper, silver and gold	294
Chapter 18. Group IIB. Zinc, cadmium and mercury.....	297
18.1. Physical properties and occurrence of group IIB elements	297
18.2. Preparation of zinc.....	298
18.3. Chemical properties of zinc.....	299
18.4. Chemical properties of mercury	300
18.5. Uses of zinc, cadmium and mercury	302
Chapter 19. Group IIIA. Boron, aluminium, gallium, indium and thallium	305
19.1. Physical properties and occurrence of group IIIA elements.....	305
19.2. Preparation of group IIIA elements	307
19.3. Chemical properties of boron and its compounds	309
19.4. Chemical properties of aluminium and its compounds	315
19.5. Uses of aluminium and boron	318
Chapter 20. Group IVA. Carbon, silicon, germanium, tin and lead	321
20.1. Physical properties and occurrence of group IVA elements	322
20.2. Carbon and its compounds	324
20.2.1. Physical properties of carbon.....	324
20.2.2. Chemical properties of carbon and its compounds	326
20.3. Silicon and its compounds.....	331
20.3.1. Preparation of silicon	332
20.3.2. Chemical properties of silicon and its compounds	332
20.4. Compounds of tin	337
20.5. Compounds of lead.....	340
20.6. Uses of carbon, silicon, tin and lead.....	343
Chapter 21. Group VA. Nitrogen, phosphorus, arsenic, antimony and bismuth	345
21.1. Physical properties and occurrence of group VA elements	346

21.2. Nitrogen and its compounds.....	348
21.2.1. Preparation of nitrogen	348
21.2.2. Chemical properties of nitrogen and its compounds.....	349
21.3. Phosphorus and its compounds	367
21.3.1. Preparation of phosphorus	369
21.3.2. Chemical properties of phosphorus and its compounds	370
21.4. Arsenic, antimony and bismuth.....	382
21.4.1. Preparation of elements.....	382
21.4.2. Chemical properties of elements and their compounds	383
21.5. Uses of group VA elements	388
Chapter 22. Group VIA. Oxygen, sulfur, selenium, tellurium and polonium	392
22.1. Physical properties and occurrence of group VIA elements	393
22.2. Oxygen and its compounds	395
22.2.1. Preparation of oxygen.....	395
22.2.2. Chemical properties of oxygen and its compounds	396
22.3. Sulfur	401
22.3.1. Preparation of sulfur	403
22.3.2. Chemical properties of sulfur and its compounds.....	403
22.4. Selenium and tellurium	418
22.4.1. Chemical properties of elements and their compounds	418
22.5. Uses of group VIA elements.....	420
Chapter 23. Group VIIA. Fluorine, chlorine, bromine, iodine and astatine	423
23.1. Physical properties and occurrence of group VIIA elements	424
23.2. Preparation of halogens.....	425
23.3. Chemical properties of halogens and their compounds.....	427
23.4. Uses of group VIIA elements	452
Literature.....	455
