

**MINISTRY OF HEALTH OF UKRAINE**  
**BOGOMOLETS NATIONAL MEDICAL UNIVERSITY**

**STUDENT'S WORKBOOK**

(auditory and extra-auditory independent work)

Academic discipline	Actual Problems of Pharmacy Education
Branch of knowledge	22 "Health care"
Specialty	226 "Pharmacy, industrial pharmacy"
Specialization	226.01 "Pharmacy"
Department	Analytical, physical and colloid chemistry

**Approved** by methodological counsel of Analytical, Physical and Colloid Chemistry Department  
Proceedings N 1 dated 29 August 2024

**Considered and approved by** cyclical methodological commission of specialty 226 "Pharmacy, industrial pharmacy"  
Proceedings N 2 dated 07 October 2024

**Authors:**

Yaroslava Pushkarova – PhD in Chemistry, Associate Professor, Associate Professor of Analytical, Physical and Colloid Chemistry Department;

Tetiana Reva – Doctor of Pedagogical Sciences, Professor, Professor of Analytical, Physical and Colloid Chemistry Department;

Oksana Chkhalo – PhD in Pedagogy, Associate Professor, Associate Professor of Analytical, Physical and Colloid Chemistry Department.

Topic 6. Pharmacy education in Ukraine and abroad, stages of its development .....	26
Topic 7. Innovative technologies of teaching disciplines .....	30
Topic 8. Research work of students .....	34
Topic 9. Today's and problems of higher education in Ukraine.....	38
Topic 10. The role of chemical and humanities in the education of pharmacists.....	41

## INTRODUCTION

The workbook for independent auditory and extra-auditory work of students of specialty 226 “Pharmacy, industrial pharmacy” for discipline “Actual problems of pharmacy education” is a structured methodical development that contains basic information for the successful assimilation of the educational material of each topic of the discipline and preparation for practical classes.

The main purpose of using the workbook is to optimize and increase the effectiveness of the educational and cognitive activity of students by mastering the skills of solving difficult problems that require updating and integration of knowledge, in particular in the healthcare; solving professional problems; be responsible for the results of their activities in complex and unpredictable conditions.

### *Features of the proposed tasks*

The proposed tasks for auditory and extra-auditory work are aimed at the development of abstract thinking, analysis and synthesis, the ability to work in a team and the formation of the ability to apply knowledge in practical situations.

### *The order of tasks for independent work*

Tasks of independent extra-auditory work should be completed till practical lesson on this topic.

Tasks of auditory independent work are completed during a practical lesson.

During performance the independent work, the student should write down his answers to the assigned tasks in the workbook.

### *Evaluation criteria*

When evaluating the performance of independent work, preference is given to structured written tasks.

The grade “**5 – Perfectly**” – student answers written tasks without mistakes.

The grade “**4 – Good**” – student answers written tasks with minor errors.

The grade “**3 – Satisfactory**” – student answers written tasks with significant errors.

The grade “**2 – Unsatisfactory**” – student answers written tasks with gross errors or does not give answers to them.

### *Rules for keeping a workbook*

Adherence to academic integrity by students involves:

- independent performance of all types of work, tasks, forms of control provided for by the work program of this educational discipline;
- references to sources of information in the case of using ideas, developments, statements, information;
- compliance with the legislation on copyright and related rights;
- providing reliable information about the results of one’s own educational (scientific, creative) activities, used research methods and sources of information.

### **Course ID: 7410**

For your attention on the platform are presented:

- academic curriculum
- syllabus
- guidelines to lectures
- guidelines to practical lectures
- presentations of lectures
- recommended literature
- workbook for auditory and extra-auditory work

The authors of the workbook hope that the proposed elective course will be interesting and useful for future masters of pharmacy!

We wish you success!

## Topic 1. Bologna process and quality of education

**Purpose:** analyze the main stages of implementation of the education system in accordance with the Bologna Declaration and the set of specified objectives of Bologna Process.

### Student should:

- to know the main stages of implementation of the education system in accordance with the Bologna Declaration;
- to analyze the set of specified objectives of Bologna Process;
- to know the main tools of Bologna Process.

### Basic concepts of the topic:

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Bologna Process	collective effort of public authorities, universities, teachers, and students, together with stakeholder associations, employers, and quality assurance agencies, that aims to create a more compatible, comparable, and coherent system of higher education in Europe.
Bologna Declaration	foundational document of the Bologna Process; the declaration aimed to establish a European Higher Education Area, with the goal of making higher education systems across Europe more compatible, comparable, and competitive globally.
ECTS credit system	standardized credit system used across the European Higher Education Area to facilitate the recognition and transfer of academic credits between institutions.

2. <https://likar.nmu.kiev.ua/md/course/view.php?id=7410>

**Questions for theoretical study:**

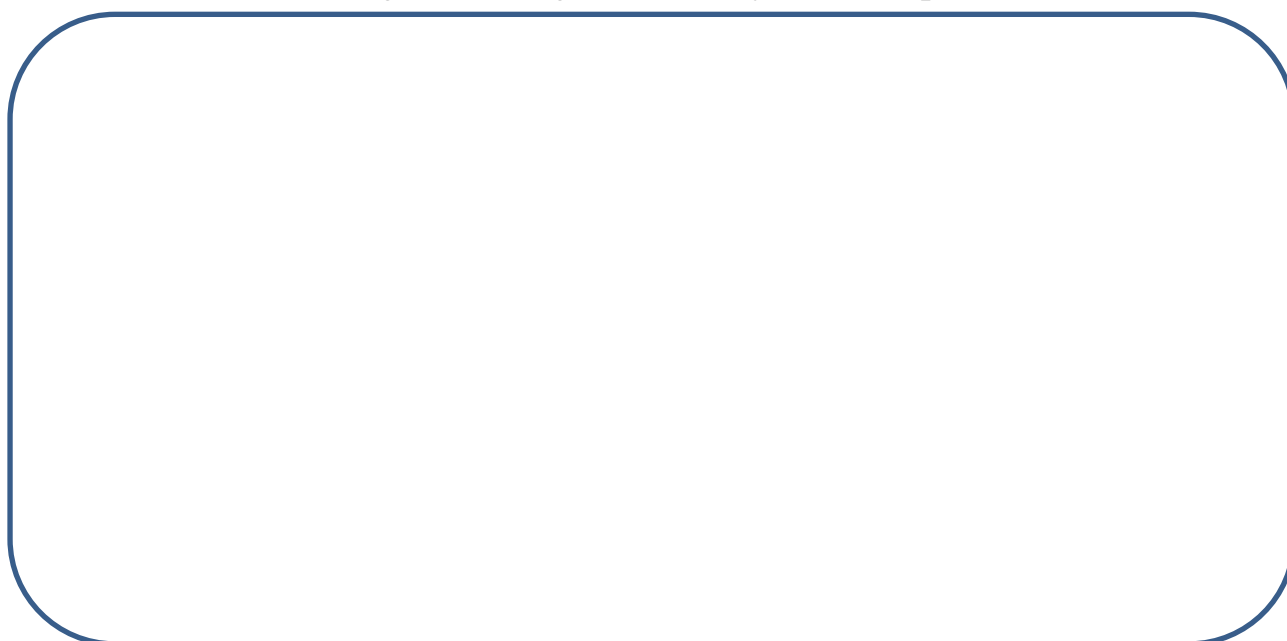

1. Main theses of Bologna Declaration.
2. Importance of Bologna Process.

**Tasks for extra-auditory independent work:**

1. Name advantages of Bologna Process (your own opinion).

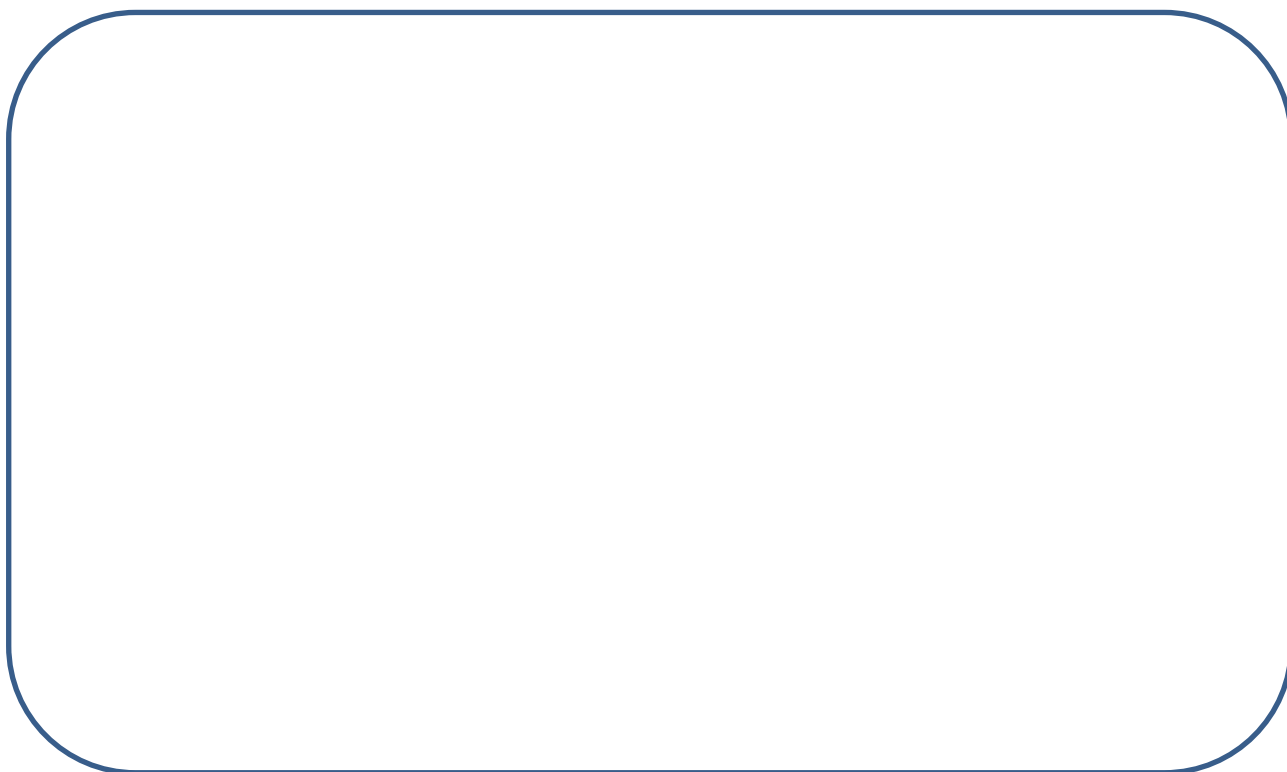

2. Name disadvantages of Bologna Process (your own opinion).

**Tasks for auditory work:**

1. Name the main theses of Bologna Declaration.

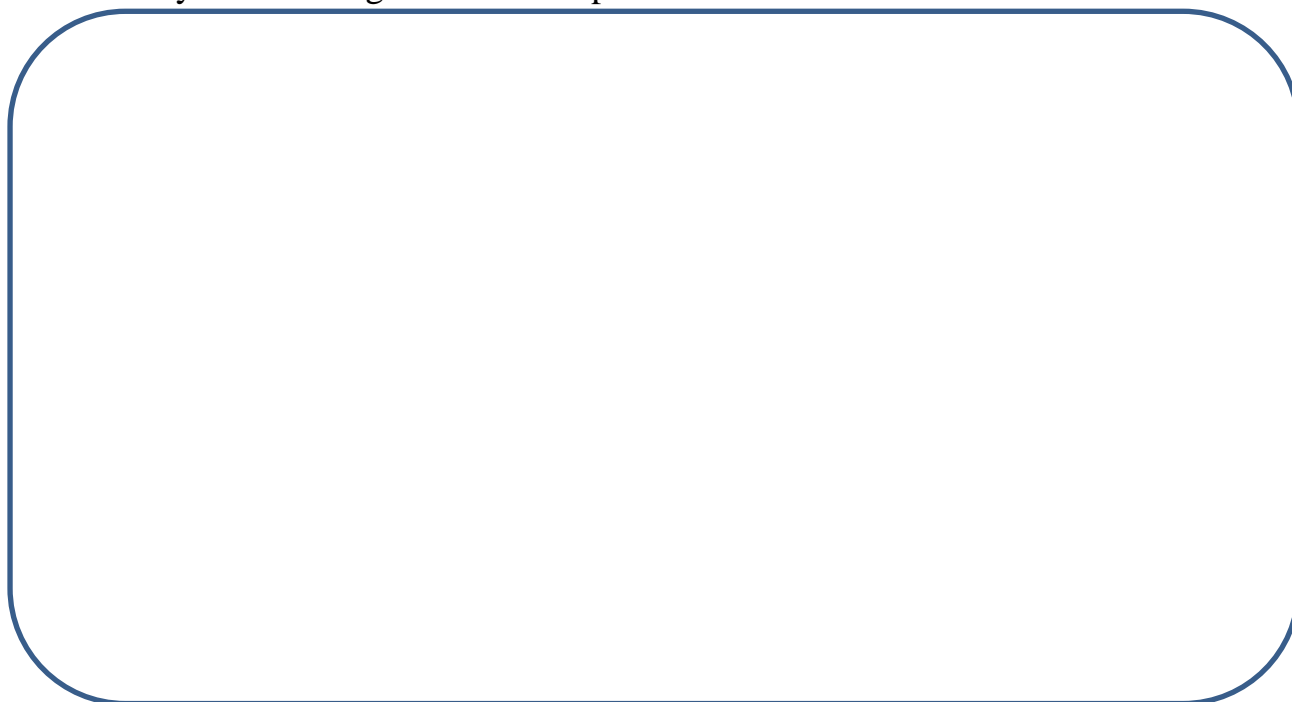

2. Explain steps of the process of Ukraine in joining the European Higher Education Area.

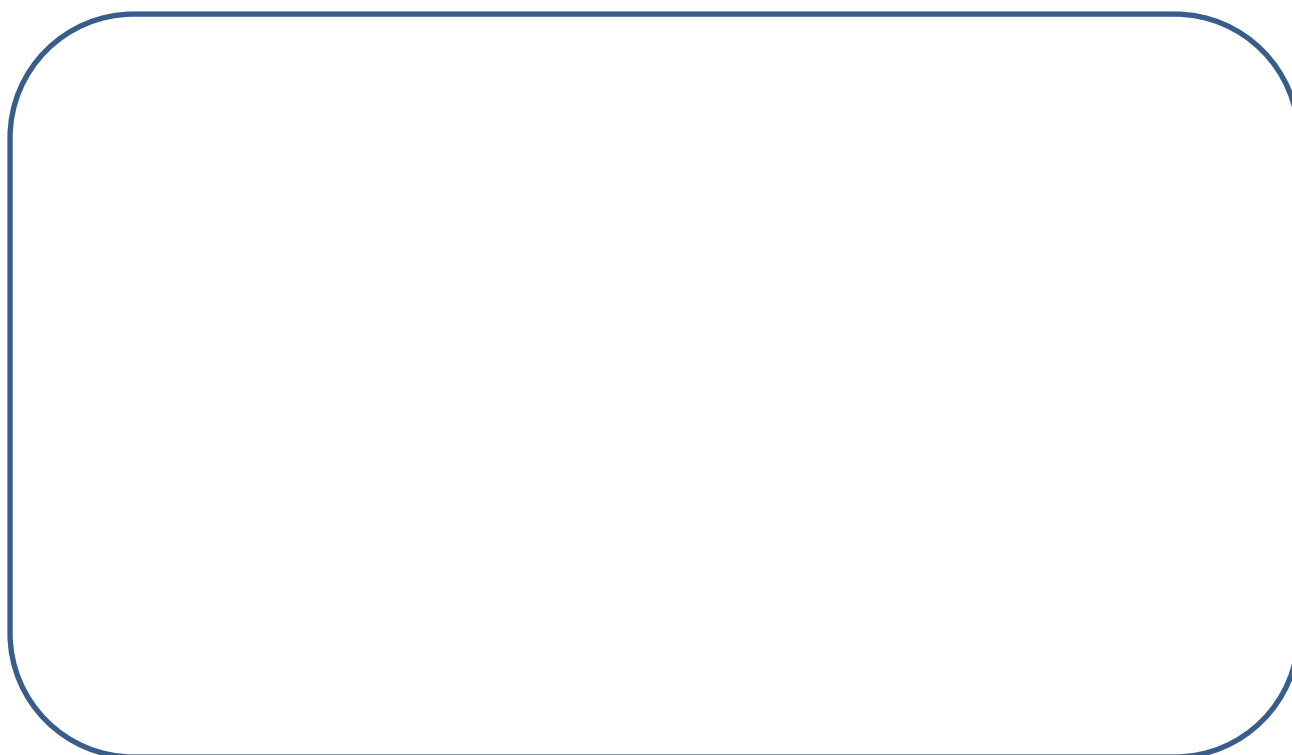

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Why is the Bologna Process important?

2. Why is ECTS needed?

## Topic 2. Restructuring of the higher education in Ukraine according to the “Law on Higher Education”, ISCED-2013 and NQFs

**Purpose:** analyze the main provisions of Law “On Higher Education”, consider education levels according to the National Qualification Framework (NQF) and the education levels according to the International Standard Classification of Education (ISCED).

### Student should:

- to analyze the main provisions of Law “On Higher Education”;
- to know the education levels according to the National Qualification Framework (NQF);
- to know the education levels according to the International Standard Classification of Education (ISCED).

### Basic concepts of the topic:

<i>Term, parameter, characteristic</i>	<i>Definition</i>
National Qualification Framework	formal system that categorizes and organizes qualifications within a country according to a set of criteria for specified levels of learning achievements; the purpose of an NQF is to provide a clear and structured way to recognize the skills, knowledge, and competencies that learners have acquired, making it easier for individuals, employers, and educational institutions to understand and compare qualifications.
International Standard Classification of Education	framework developed by the United Nations Educational, Scientific and Cultural Organization (UNESCO) to categorize and compare education systems across different countries; it provides a comprehensive structure for classifying educational programs by their levels and fields of study, ensuring that educational statistics and data are comparable internationally.

2. <https://likar.nmu.kiev.ua/md/course/view.php?id=7410>

**Questions for theoretical study:**

1. Mission Statement and Strategy of the National Agency for Higher Education Quality Assurance (NAQA).
2. National Qualification Framework (NQF).
3. International Standard Classification of Education (ISCED).

**Tasks for extra-auditory independent work:**

1. Explain the three cycle structure of Higher Education.

2. What is National Agency for Higher Education Quality Assurance?

3. How much levels of education are exist according to the National Qualifications Framework?

**Tasks for auditory work:**

1. What are the main provisions of Law “On Higher Education”?

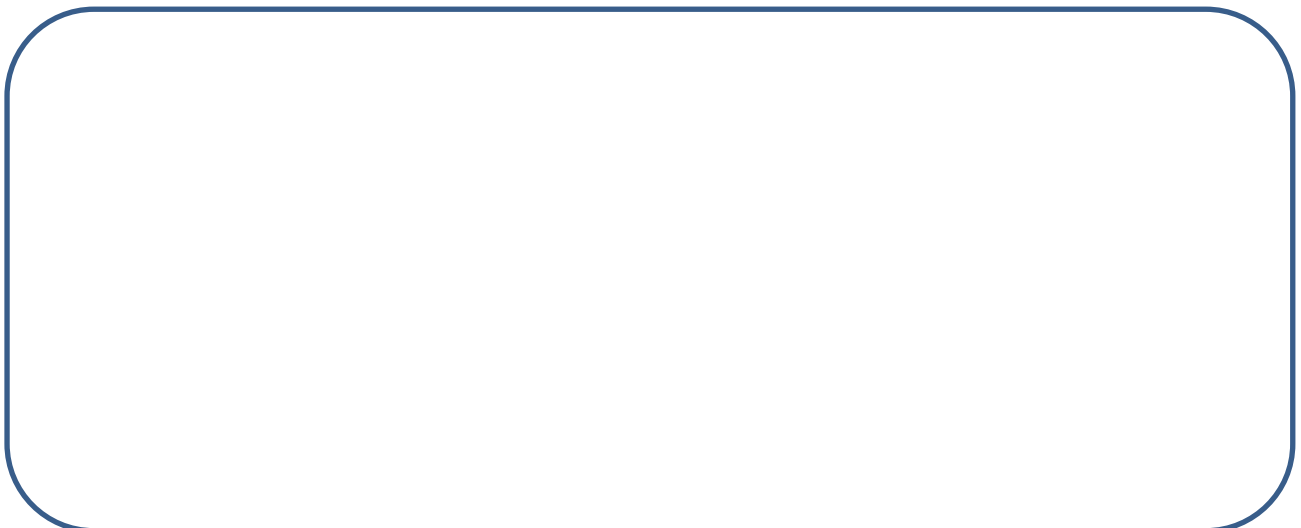

2. What are the main strategic goals of the National Agency for Higher Education Quality Assurance?

3. Explain the competencies according to the second level of higher education (master's degree) according to the National Qualifications Framework. Give examples.

4. Explain the main points of International Standard Classification of Education.

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Do you support the implementation of the Law of Ukraine “On Higher Education”? Explain your answer.

2. Describe the correspondence between ISCED 2011 and ISCED 1997 levels.

### Topic 3. Organization and control of independent work of students

**Purpose:** analyze the role, types and organization of independent students' work.

**Student should:**

- to know the concept of “independent work”;
- to analyze the role and importance for independent students' work;
- to know the means of organizing independent activities of students;
- to know the types of independent activities of students.

**Basic concepts of the topic:**

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Concept of “independent work”	the concept of “independent work” refers to tasks or activities that individuals carry out on their own, without direct supervision or collaboration with others; it is an essential component of learning and professional development, emphasizing personal responsibility, self-direction, and initiative.
Key Characteristics of Independent Work	Self-Motivation: The ability to stay focused and driven without external prompts. Time Management: Efficiently organizing one's schedule and prioritizing tasks. Accountability: Taking responsibility for one's work and outcomes. Resourcefulness: Finding and using appropriate resources to complete tasks. Critical Thinking: Analyzing situations and making decisions independently.

2. <https://likar.nmu.kiev.ua/md/course/view.php?id=7410>

**Questions for theoretical study:**

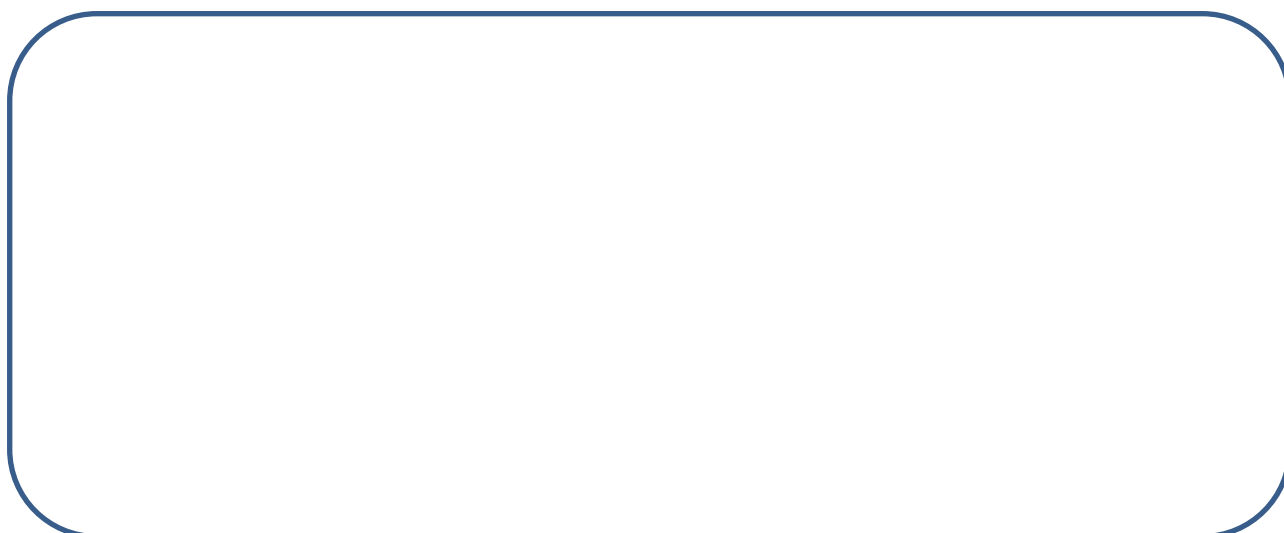

1. Organization of independent work of students’ on credit technology.
2. Types of independent activities of students.
3. Role of independent students’ work.

**Tasks for extra-auditory independent work:**

1. Name the means of organizing independent activities of students.

2. Which types of independent work are now present in your education?

**Tasks for auditory work:**

1. Why independent work is important for future pharmacist?

2. Analyze the levels of individual work and try to find correspondence between them and disciplines. To each of studying discipline propose the most appropriate level of students' individual work.

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Which means of organizing independent activities of students are the most useful in pharmacy education? Explain your answer.

A large, empty rounded rectangular box with a blue border, intended for student work.

2. Compare auditory and extra-auditory independent work of students.

A large, empty rounded rectangular box with a blue border, intended for student work.

## Topic 4. Current trends in the development of higher pharmacy education

**Purpose:** analyze the factors, which affect the learning process in pharmacy education and particularly lifelong learning; consider a student-centered approach to teaching.

**Student should:**

- to analyze the factors, which affect the learning process in pharmacy education and particularly lifelong learning;
- to analyze a student-centered approach to teaching;
- to know the relations between teaching and learning.

**Basic concepts of the topic:**

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Higher pharmacy education	involves advanced training and education for those pursuing careers in pharmacy; it generally includes undergraduate, graduate, and postgraduate levels of study, focusing on preparing students for professional practice, research, and leadership roles in the field of pharmacy.
Current trends in the development of higher pharmacy education	reflect the evolving landscape of healthcare, technological advancements, and changes in the pharmaceutical industry.

**Questions for theoretical study:**

1. Learning to teach.
2. Students' thinking and reasoning.
3. Changing pharmacy teaching.

**Tasks for extra-auditory independent work:**

1. Students' learning: definition and improving

2. Constructive alignment and motivation.

**Tasks for auditory work:**

1. Teachers' approaches to teaching.

2. Assessment methods.

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Summarize key trends of the development of higher pharmacy education.

## Topic 5. Education of a leader in the pharmaceutical industry

**Purpose:** analyze the reasons why leadership is important for pharmacy education; analyze “seven-star pharmacist” concept and “eight-star pharmacist” concept.

### Student should:

- to know what is leadership;
- to analyze the reasons why leadership is important for pharmacy education;
- to analyze seven-star pharmacist concept;
- to analyze eight-star pharmacist concept;
- to know leadership competencies.

### Basic concepts of the topic:

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Leadership	combination of skills, behaviors, and qualities that help direct and motivate a group or organization.
Education of a leader	blend of formal and informal learning experiences that equip them with the skills, knowledge, and qualities necessary for effective leadership.
“Seven-Star Pharmacist” concept	comprehensive framework developed by the International Pharmaceutical Federation to define the evolving role of pharmacists in modern healthcare systems; this concept outlines seven key roles that pharmacists should ideally fulfill to provide optimal care and meet the diverse needs of patients.

**Questions for theoretical study:**

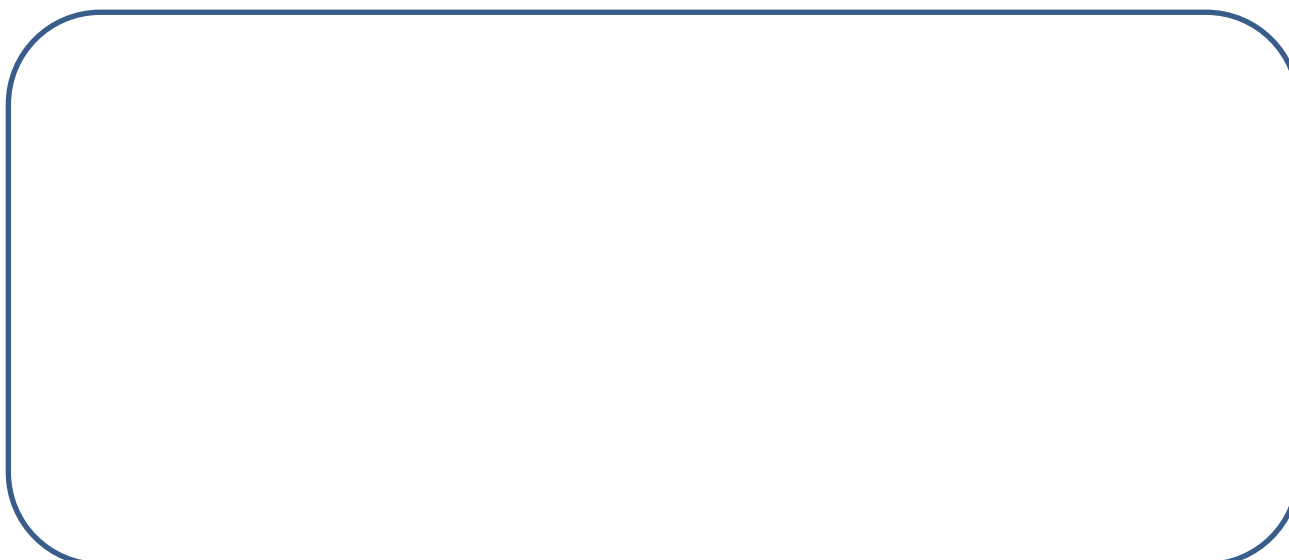

1. Seven-star pharmacist concept and eight-star pharmacist concepts.
2. Leadership competencies.

**Tasks for extra-auditory independent work:**

1. There many defunitions of leadership. Propose the best definition for term “leadership” according to your own opinion. Argue your answer.

2. Name leadership competencies. Which are the most important according to your own opinion?

**Tasks for auditory work:**

1. Seven-star pharmacist concept and eight-star pharmacist concept. Explain each attribute of these concepts.

2. Is an additional eighth attribute (researcher) important for pharmacy education? Explain your answer.

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Why leadership is important for pharmacy education?

## Topic 6. Pharmacy education in Ukraine and abroad, stages of its development

**Purpose:** analyze the specific peculiarities, principles and features of the occupational training of pharmaceutical industry professionals; consider the main stages of development of the occupational training of pharmaceutical industry professionals in Ukraine.

### Student should:

- to analyze the specific peculiarities, principles and features of the occupational training of pharmaceutical industry professionals;
- to know the main stages of development of the occupational training of pharmaceutical industry professionals in Ukraine.

### Basic concepts of the topic:

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Pharmacy education development	involves enhancing and evolving the educational frameworks, curricula, and methods to better prepare future pharmacists for the changing landscape of healthcare.

### Questions for theoretical study:

1. Basic trends of the system of the occupational training of pharmaceutical industry professionals in Ukraine.

2. Formation and development of the pharmaceutical science in Ukraine.
3. Development stages of the occupational training of pharmaceutical industry professionals in Ukraine.

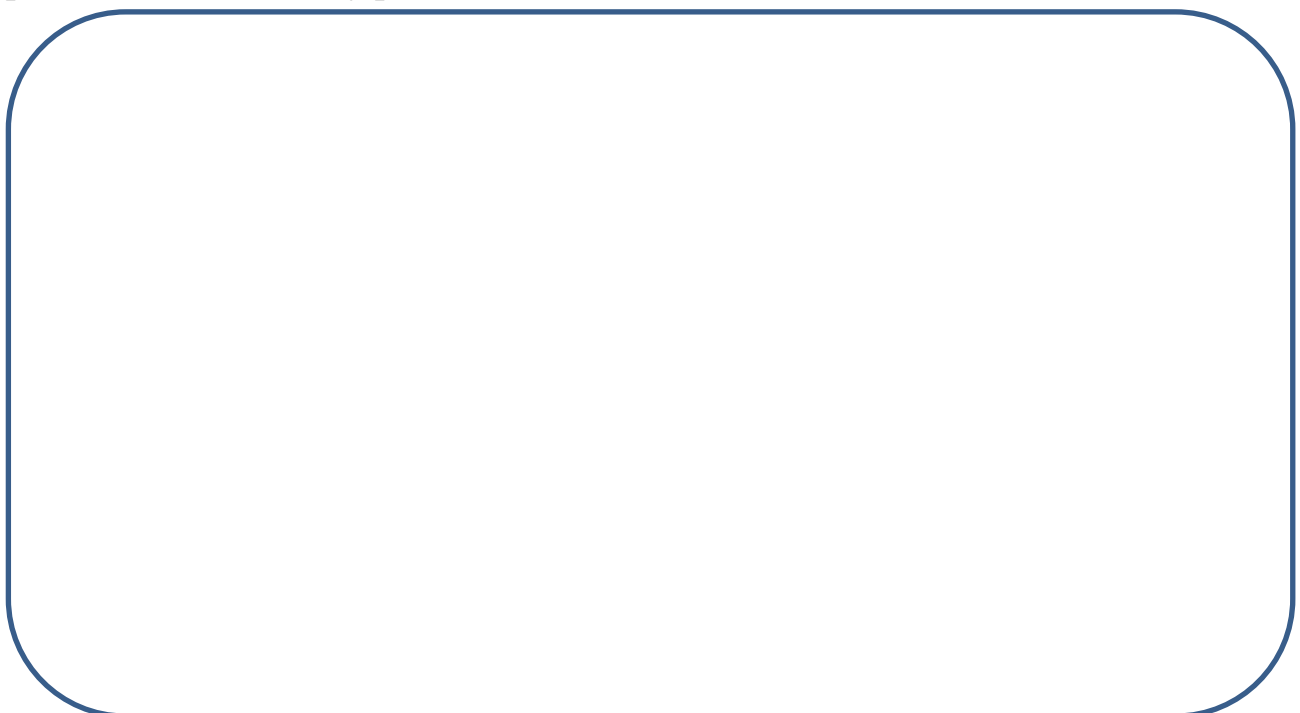

**Tasks for extra-auditory independent work:**

1. Explain the essential changes of the pharmaceutical education of Ukraine since the end of XX century suffered.

**Tasks for auditory work**

1. By which processes the development of the occupational training of pharmaceutical industry professionals in Ukraine are driven?

2. Where was the best progress in the development of pharmacy in the early 20th century?

3. Which Public organizations and societies were exist of the early 20th century?

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Analyze the specific peculiarities, principles and features of the occupational training of pharmaceutical industry professionals.

## Topic 7. Innovative technologies of teaching disciplines

**Purpose:** analyze the different types of innovative technologies in the process of online education; analyze the place and role of information technology in the innovative education development.

**Student should:**

- to determine different definitions of term “innovation”;
- to discuss the different types of innovative technologies in the process of remote education;
- to analyze the place and role of information technology in the innovative education development;
- to analyze the structure, the ways and the main components of the innovative education development;
- to examine the place and role of information technology in the strategy of innovative education development.

**Basic concepts of the topic:**

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Innovation	process of creating, developing, and implementing new ideas, methods, products, or services that provide value or solve problems in novel ways.
Information technology	broad range of technologies and practices involved in managing and using computer systems, software, and networks to support various functions in organizations and daily life.
Innovative education development	implementation of new and creative approaches to enhance teaching, learning, and educational outcomes.

### **Questions for theoretical study:**

1. Top innovative technologies in education.
2. Development and application of innovative technologies in the process of online education.

### **Tasks for extra-auditory independent work:**

1. Analyze the different definitions of term “innovation” and propose the best definition according to your opinion.

2. Which innovative technologies do you use during the distance education? Which are the most useful?

**Tasks for auditory work:**

1. Analyze the different types of innovative technologies in the process of distance education and indicate cons and pros of each one.

2. Explain the structure, the ways and the main components of the innovative education development.

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Explain the place and role of information technology in the innovative education development.

2. Analyze the role of e-mail and messengers in education.

## Topic 8. Research work of students

**Purpose:** analyze purposes, tasks and objectives of research work of students; analyze the role of research work in pharmacy education; consider research work as one of the mechanisms for the integration of higher professional education into a modern innovative society.

### Student should:

- to analyze purposes, tasks and objectives of research work of students;
- to analyze the different definitions of the term “research”;
- to analyze the role of research work in pharmacy education;
- to consider research work as one of the mechanisms for the integration of higher professional education into a modern innovative society.

### Basic concepts of the topic:

<i>Term, parameter, characteristic</i>	<i>Definition</i>
Research	systematic and methodical process of inquiry designed to generate new knowledge, insights, or understanding about a particular subject or problem; it involves the collection, analysis, and interpretation of data to answer specific questions, solve problems, or contribute to the existing body of knowledge.
Research work of students	investigative activities undertaken by students as part of their academic or extracurricular pursuits; this work involves exploring a particular topic or question, gathering and analyzing data, and presenting findings to contribute to knowledge in their field of study.

**Questions for theoretical study:**

1. Importance of chemistry knowledge for a pharmacist.
2. Importance of humanistic subjects for a pharmacist.

**Tasks for extra-auditory independent work:**

1. Why study humanistic subjects?

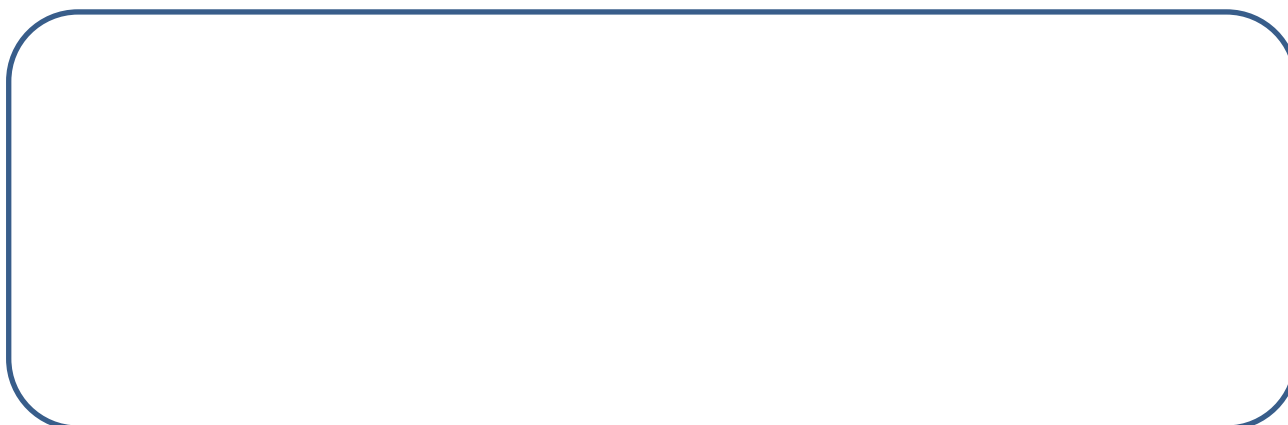

2. Propose new elective courses which you want study in Bogomolets National Medical University.

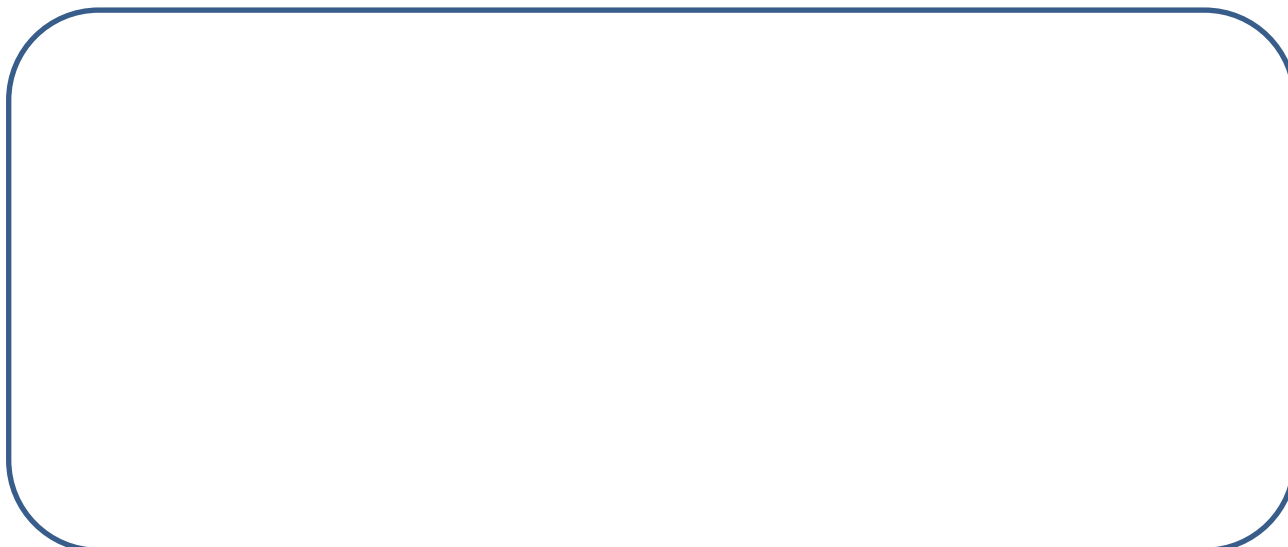

**Tasks for auditory work:**

1. Why chemistry is important for pharmacist?

2. Which types of chemistry are important for pharmacist?

**Tasks for auditory independent work (under the supervision of a teacher):**

1. Analyze the arguments that the humanities are important.
