

BOGOMOLETS NATIONAL MEDICAL UNIVERSITY

Department of Forensic Medicine and Medical Law

GUIDELINES to practical classes of students

Study discipline	Pharmaceutical Law and Legislation
Educational qualification	second (master's) level of higher education
Branch of knowledge	22 "Healthcare"
Specialty	226 "Pharmacy, Industrial Pharmacy"
Educational program	educational-professional program "Pharmacy" for second (master's) level of higher education, specialty 226 "Pharmacy, Industrial Pharmacy"

Approved: at the meeting of the department of forensic medicine and medical law on August 27, 2024, protocol No. 1.

Considered and approved: at the meeting of the cyclic methodical commission for natural sciences dated August 28, 2024, protocol No. 1.

Topic 5. The mechanism of state registration and admission of new medicinal products for use in Ukraine. Intellectual property in the field of pharmaceutical activity

The methodical development was made by **A.B. Berzina**, associate professor of the Department of Forensic Medicine and Medical Law of Bogomolets National Medical University, candidate of legal sciences, associate professor.

Competences: ability to use knowledge of regulatory and legislative acts of Ukraine and recommendations of proper pharmaceutical practices in professional activities.

Purpose: understanding the educational mechanisms of state regulation of pharmaceutical activity is definitely important and relevant for students. Clarifying the specifics of the mechanism of state registration of medicinal products and admission of new medicinal products to circulation in Ukraine is a basic element in the pharmaceutical education system. To obtain this education, it is necessary to clarify the peculiarities of the work of the State Register of Medicinal Products and the state regulation of the quality of medicinal products. This is impossible without understanding and having general ideas about intellectual property law: objects of intellectual property (marks for goods and services, patented inventions, industrial designs, objects of copyright, undisclosed information) and subjects of the creation of a medicinal product.

Equipment: personal computer

Lesson plan and organizational structure

Organizational structure of the lesson				
№	The main stages of the lesson, their content	Control and training methods	Methodological support materials	Time
1	Determination of the basic level of students	Teacher control	Test tasks	30
2	Individual student's work of students when solving situational problems	Oral survey	Teacher's question	30
4	Correction of knowledge, skills and abilities by the teacher	Discussion	Teacher's question. Situational tasks.	20
6	Summary of the lesson		Teacher's conclusions	10
Total 90 minutes (2 academic hours)
