The textbook "Psychology and Pedagogy" presents the principles of the normative course of psychology and pedagogy. It analyzes the correspondence to mental processes, mental activity, emotional-volitional sphere, and individual personality traits. Aspects of personality psychology, group psychology, and communication psychology are examined. Methodology is explored extensively, covering the application of worldview principles from theory to practice and creativity.

The modern development of technologies creates new challenges for creative thinking and youth personality formation. As G.S. Kostyuk once predicted, practical
