Objectives

The objectives of the Society are the advancement of medical practice through science; the cultivation of clinical research by the methods of the natural sciences; the correlation of science with the art of medical practice; the fostering of high standards of ethical practice and investigation; and the diffusion of a spirit of fraternity and international co-operation among and through its members.

Membership

Any person who has been actively involved in medical research in Europe, for example by involvement in original investigations in clinical or allied sciences of medicine, can apply for membership of ESCI. Members will receive the *EJCI* monthly.

Young scientists under the age of 30 can apply for junior membership (for a maximum of up to three years) to a reduced membership fee.

Any company, corporation, organisation, or trust can apply for corporate membership in the Society.

Meetings

The Society holds one Annual Scientific Meeting each year, usually in April/May. Meetings are held in different centres in Europe. Other Society's activities include the sponsorship of Workshops and Postgraduate Courses and the encouragement of the exchange of Scientists between Laboratories.

Agreement between the European Society for Clinical Investigation and the American Federation for Medical Research

An agreement has been reached between the councils of the ESCI and AFMR as follows:

(i) *ESCI members* can now submit abstracts for presentation at the joint Annual Meetings of the AFMR, AAP and ASCI.

(ii) *ESCI members* can apply for membership of AFMR on the normal terms. Those wishing to apply for membership should download an application form from the *Journal of Investigative Medicine*.

(iii) *AFMR members* can submit abstracts for presentation at the Annual Scientific Meetings of ESCI. Details of ESCI Meetings will appear regularly in the *Journal of Investigative Medicine*, and AFMR members can submit abstracts to ESCI when submission opens.

(iv) *AFMR members* can apply for membership of ESCI on the normal terms.
