Coté and Lerman's A Practice of Anesthesia for Infants and Children

SIXTH EDITION

Charles J. Coté, MD, FAAP

Professor of Anaesthesia (Emeritus)

Harvard Medical School

Division of Pediatric Anesthesia

MassGeneral Hospital for Children

Department of Anesthesia, Critical Care and Pain Management

Massachusetts General Hospital

Boston, Massachusetts

Jerrold Lerman, MD, FRCPC, FANZCA

Clinical Professor of Anesthesia

Staff Anesthesiologist

John R. Oishei Children's Hospital,

Jacobs School of Medicine and Biomedical Sciences

Buffalo, New York

Brian J. Anderson, MB, ChB, PhD,
FANZCA, FCICM

Professor of Anesthesiology

University of Auckland;

Paediatric Anaesthetist and Intensivist

Paediatric Intensive Care Unit

Auckland Children's Hospital

Auckland, New Zealand

Section I Introduction

1 The Practice of Pediatric Anesthesia

Preoperative Evaluation and Management

Informed Consent

Operating Room and Monitoring

Induction and Maintenance of Anesthesia

Clinical Monitors

Airway and Ventilation

Fluids and Perfusion

Conduct of the Anesthesia Team

The Postanesthesia Care Unit

Postoperative Visit

Summary

2 Growth and Development

Normal and Abnormal Growth and Maturation

Gestational Age Assessment

Airway and Respiratory System

Cardiovascular System

Renal System

Digestive and Endocrine System

Hematopoietic and Immunologic System

Neurologic Development and Cognitive Development Issues

Acknowledgment

References

3 Perioperative Behavioral Stress in Children

Developmental Issues

Preoperative Anxiety

Postoperative Outcomes

Intraoperative Clinical Outcomes

Summary

References

4 Preoperative Evaluation, Premedication, and Induction of Anesthesia

Preparation of Children for Anesthesia

Premedication and Induction Principles

Induction of Anesthesia

Special Problems

Acknowledgment

References

5 Ethical Issues in Pediatric Anesthesiology

Informed Consent

End-of-Life Issues

Clinical and Academic Practice Issues

References

Section II Drug and Fluid Therapy

6 Pharmacogenomics

Historical Perspectives

Basic Concepts and Nomenclature

Hepatic Metabolism and Developmental Pharmacogenetics

Genomics of Drug Metabolism, Exposure, and Effects

Pharmacogenomics of Pain and Analgesia

Genetic Variations Affecting Opioid Pharmacokinetics

Genetic Variations Affecting Opioid Pharmacodynamics

Genes of Addiction

Nonsteroidal Antiinflammatory Drugs and Genetics

Acetaminophen and Genetics

Chronic Pain, Persistent Postoperative Pain, and Genetics

Pharmacogenomics Affecting Anesthesia

Perioperative Outcomes

Ancestry/Race and Genetics

Pharmacogenomics Methods

Genetic Counseling

Clinical Translation: Bench to Bedside: Where Are We Now?

Conclusion

References

7 Pharmacokinetics and Pharmacology of Drugs Used in Children

Pharmacokinetic Principles and Calculations

Population Modeling

Pediatric Pharmacokinetic Considerations

Pharmacodynamic Models

Linking Pharmacokinetics With Pharmacodynamics

Drug Distribution

Absorption

Bioavailability

Metabolism and Excretion

Central Nervous System Effects

Pharmacodynamics in Children

Drug Interactions

The Drug Approval Process, the Package Insert, and Drug Labeling

Inhalation Anesthetic Agents

Oxygen

Intravenous Anesthetic Agents

Neuromuscular Blocking Drugs

Depolarizing Neuromuscular Blocking Drugs

Intermediate-Acting Nondepolarizing Neuromuscular Blocking Drugs

Long-Acting Nondepolarizing Neuromuscular Blocking Drugs

Antagonism of Neuromuscular Blocking Drugs

Neuromuscular Blocking Drugs in Special Situations

Opioids

Acetaminophen

Nonsteroidal Antiinflammatory Agents

Benzodiazepine Sedatives

Other Sedatives

Antihistamines

Antiemetics

Anticholinergics

Antagonists

References

8 Total Intravenous Anesthesia and Target-Controlled Infusion

Pharmacokinetic and Pharmacodynamic Principles

Pharmacodynamic Interaction Models

Depth of Anesthesia Monitoring

A Practical Approach in Children

Acknowledgement

References

Suggested Websites

9 Fluid Management

Regulatory Mechanisms: Fluid Volume, Osmolality, and Arterial Pressure

Maturation of Fluid Compartments and Homeostatic Mechanisms

Fluid and Electrolyte Requirements

Intraoperative Fluid Management

Postoperative Fluid Management

Pathophysiologic States and Their Management

Acknowledgment

References

10 Essentials of Hematology

The Basics

Hemolytic Anemias

Thrombocytopenia

Coagulation Disorders

Hematologic Malignancies

References

11 Perioperative Management of the Oncology Patient

Principles of Cancer Therapy

Preoperative Considerations by Organ System

Hematopoietic Stem Cell Transplant

Adoptive T-Cell Therapies in Children

Preoperative Laboratory Testing and Evaluation

Perioperative Considerations

Transfusion Considerations

Effects of Anesthetic Agents on Perioperative Immunomodulation

Summary

References

12 Strategies for Blood Product Management, Reducing Transfusions, and Massive Blood Transfusion

Blood Volume

Blood Components and Alternatives

Massive Blood Transfusion

Methods to Reduce Patient Exposure to Allogeneic Blood Components

Acknowledgment

References

Section III The Chest

13 Essentials of Pulmonology

Respiratory Physiology

Preoperative Assessment

Pulmonary Function Tests

Perioperative Etiology and Epidemiology

Summary

References

14 The Pediatric Airway

Developmental Anatomy of the Airway

The Larynx

Physiology of the Respiratory System

Evaluation of the Airway

Airway Management: The Normal Airway

Airway Management: The Abnormal Airway

Acknowledgments

References

15 Anesthesia for Thoracic Surgery

General Perioperative Considerations

Summary

References

Section IV The Heart

16 Essentials of Cardiology

Congenital Heart Disease

Acquired Heart Disease

Heart Failure in Children

Syndromes, Associations, and Systemic Disorders: Cardiovascular Disease and Anesthetic Implications

Selected Vascular Anomalies and Their Implications for Anesthesia

Evaluation of the Child With a Cardiac Murmur

Basic Interpretation of the Electrocardiogram in Children

Essentials of Cardiac Rhythm Interpretation and Acute Arrhythmia Management in Children

Pacemaker and Defibrillator Therapy in the Pediatric Age Group

Diagnostic Modalities in Pediatric Cardiology

Perioperative Considerations for Children With Cardiovascular Disease

Summary

Acknowledgment

References

17 Anesthesia for Children Undergoing Heart Surgery

Preoperative Evaluation

Perioperative Challenges in Pediatric Cardiac Anesthesia

Anesthesia Management for Surgery Requiring Cardiopulmonary Bypass

Control of Systemic and Pulmonary Vascular Resistance During Anesthesia

Anesthetic Drugs Used in Pediatric Cardiac Anesthesia

Regional Anesthesia

Fast Tracking

Cardiopulmonary Bypass

Stress Response to Cardiac Surgery

Anesthesia Considerations for Specific Cardiac Defects

Transport and Transfer to a Pediatric Intensive Care Unit

Acknowledgment

References

18 Cardiac Physiology and Pharmacology

Cardiovascular Physiology

Incidence and Prevalence of Congenital Heart Disease

Pathophysiologic Classification of Congenital Heart Disease

Special Situations

Cardiovascular Pharmacology

Acknowledgments

References

19 Cardiopulmonary Bypass and Management

Basic Aspects of Cardiopulmonary Bypass

Special Coagulation and Hematologic Problems

A Perspective on Blood Preservation: Cardiopulmonary Bypass in Jehovah's Witness Patients

Myocardial Protection

Phases of Cardiopulmonary Bypass

Particular Aspects of Management on Cardiopulmonary Bypass

Prebypass Anesthetic Management

Anesthesia on Cardiopulmonary Bypass

Special Techniques

Effects of Cardiopulmonary Bypass

Transport to the Intensive Care Unit

Summary

References

20 Medications for Hemostasis

Physiology of Coagulation

Developmental Coagulation
Coagulopathy and Major Surgery
Alterations in Hemostasis During Pediatric Cardiac Surgery
Medications Used for Hemostasis
New Drug Development
Summary
Acknowledgment
References

21 Mechanical Circulatory Support

Indications for Mechanical Circulatory Support
Contraindications
The Devices
Extracorporeal Membrane Oxygenation
Ventricular Assist Devices
Perioperative Management of Mechanical Circulatory Support
Outcomes and Complications
The Future
References

22 Interventional Cardiology

Types of Procedures Performed
Complications and Limitations of Procedures
Anesthesia
Acknowledgment
References

23 Anesthesia for Noncardiac Surgery in Children With Congenital Heart Disease

Preoperative Assessment
Intraoperative Management
Postoperative Care
Perioperative Problems and Special Considerations

Outcomes of Noncardiac Surgery
Specific Congenital Heart Defects
Summary
References

Section V The Brain and Glands

24 Essentials of Neurology and Neuromuscular Disorders

General Considerations
Static Neurologic Disorders
Progressive Neurologic Disorders
Neuromuscular Disorders
Epilepsy
Summary
References

25 Surgery, Anesthesia, and the Immature Brain

Background
Normal Brain Development
Effects of Anesthetic Exposure on the Developing Brain
Putative Mechanisms for Neurotoxicity
Specific Anesthetic and Sedative Agents
Exposure Time, Dose, and Anesthetic Combinations
Deleterious Effects of Untreated Pain and Stress
Potential Alleviating Strategies
Anesthetic Neuroprotection
Critical Evaluation of Animal Studies and Interspecies Comparisons
Long-Term Outcome in Children Exposed to Anesthesia and Surgery
Outcome After Exposure to Anesthesia Outside of the Operating Room
Limitations of the Available Clinical Studies
Future Research
Recommendations for Clinical Practice

References

26 Pediatric Neurosurgical Anesthesia

Pathophysiology

Management of Anesthesia

Special Situations

Acknowledgments

References

27 Essentials of Endocrinology

Diabetes Mellitus*

Diabetes Insipidus

Syndrome of Inappropriate Antidiuretic Hormone Secretion

Thyroid Disorders

Parathyroid and Calcium Disorders

Adrenal Disorders

Pheochromocytoma

References

Section VI The Abdomen

28 Essentials of Nephrology

Renal Physiology

Disease States

Preoperative Preparation of the Child With Renal Dysfunction

Intraoperative Management

References

29 General Abdominal and Urologic Surgery

General Principles of Abdominal Surgery

General Principles of Urologic Surgery

Laparoscopic Surgery

Robot-Assisted Surgery

Specific General Surgical and Urologic Conditions

Bariatric Surgery in Children

Acknowledgments

References

30 Essentials of Hepatology

Anatomy

Principles of Hepatic Drug Metabolism

Anesthetic Agents

Anesthetic Effects on Hepatic Cellular Functions

Perioperative Considerations in Liver Disease

References

31 Organ Transplantation

Liver Transplantation

Renal Transplantation

Cardiac Transplantation

Pediatric Lung and Heart-Lung Transplantation

References

Section VII Other Surgeries

32 Orthopedic and Spine Surgery

Scoliosis Surgery

Risk Minimization and Improving Outcome From Surgical Intervention

Spinal Cord Injury During Surgery

Preoperative Assessment and Postoperative Planning

Anesthetic and Intraoperative Management

Tourniquets

Acute Bone and Joint Infections

Common Syndromes

References

33 Otorhinolaryngologic Procedures

Anesthesia for Otologic Procedures
Anesthesia for Rhinologic Procedures
Adenotonsillectomy
Anesthesia for Endoscopy
Upper Airway Obstruction
Tracheostomy
Laryngotracheal Reconstruction
Airway Trauma
Acknowledgment
References

34 Ophthalmology

Preoperative Evaluation
Common Ophthalmologic Diagnoses Requiring Surgery
Ophthalmologic Conditions Associated With Systemic Disorders
Ophthalmologic Pharmacotherapeutics and Systemic Implications
Specific Ophthalmologic Procedures
Acknowledgment
References

35 Plastic and Reconstructive Surgery

Cleft Lip and Palate
Craniosynostosis
Orbital Hypertelorism
Midface Procedures
Hemifacial Microsomia, Treacher Collins Syndrome, and Goldenhar Syndrome
Orthognathic Surgery
Cystic Hygromas and Hemangiomas
Möbius Syndrome
Congenital Intraoral Fibrous Bands
Intraoral Tumors

Brachial Plexus Surgery
Otoplasty
Congenital Hand Anomalies
Tissue Expanders
Hairy Pigmented Nevi
Cosmetic Procedures
Trauma
Acknowledgments
References

36 Burn Injuries

Pathophysiology
Pharmacology
Resuscitation and Initial Evaluation
Guidelines to Anesthetic Management
Summary
Acknowledgment
References

Section VIII Emergencies

37 The Extremely Premature Infant (Micropremie) and Common Neonatal Emergencies

Physiology of Prematurity Related to Anesthesia
Anesthetics and the Neonate/Premature Infant
Neonatal Surgical Emergencies
Emergency Surgery
References

38 Fetal Intervention and the EXIT Procedure

A Range of Anesthetic Options for Mother and Fetus
Fetal Development
Fetal Monitoring

Physiologic Consequences of Pregnancy
Fetal Preoperative Evaluation
Maternal Evaluation
Tocolysis and Tocolytic Agents
Congenital Cystic Adenomatoid Malformation: the Open Procedure
Other Diseases Eligible for Open Procedures
Hypoplastic Left Heart Syndrome: Percutaneous and Fetoscopic Procedures
Other Diseases Eligible for Fetoscopic Procedures
The EXIT Procedure
Movement Toward Intervention for Non–Life-Threatening Diseases: Myelomeningocele
Future Considerations
References

39 Trauma

Epidemiology of Pediatric Trauma
Nonaccidental Trauma
Prehospital Care of the Pediatric Trauma Patient
Emergency Department Evaluation and Management of the Pediatric Trauma Patient
Anesthesia Management of the Pediatric Trauma Patient
Future Directions in Pediatric Trauma
Summary
Acknowledgment
References

40 Cardiopulmonary Resuscitation

Historical Background
Epidemiology, Prevention, and Outcome of In-Hospital Cardiopulmonary Arrest
Diagnosis of Cardiac Arrest
Mechanics of Cardiopulmonary Resuscitation

Defibrillation and Cardioversion

Vascular Access and Monitoring During Cardiopulmonary Resuscitation

Medications Used During Cardiopulmonary Resuscitation

Special Cardiac Arrest Situations

Adjunctive Cardiopulmonary Resuscitation Techniques

Postresuscitation Stabilization (Post–Cardiac Arrest Care)

The 2015 AHA Pediatric Advanced Life Support Guidelines Update

References

41 Malignant Hyperthermia

Clinical Presentation

Patient Evaluation and Preparation

Monitoring

Diagnosis

Management, Susceptibility Screening, and Counseling

Genetics

Physiology

Laboratory Diagnosis

Other Disorders and Malignant Hyperthermia

Summary

References

Section IX Pain

42 Regional Anesthesia

Pharmacology and Pharmacokinetics of Local Anesthetics

Equipment

Specific Procedures

Summary

Acknowledgment

References

43 Ultrasound-Guided Regional Anesthesia

Principles of Ultrasound

Essentials of Musculoskeletal Ultrasound Imaging

Identification of Nerves, Tendons, Muscle, Fat, Bone, Fascia, Blood Vessels, and Pleura

Special Techniques

Specific Ultrasound-Guided Nerve Blocks

Education and Training

Summary

Acknowledgment

References

44 Acute Pain

Developmental Neurobiology of Pain

Pain Assessment

Strategies for Pain Management

Pharmacologic Treatment of Pain

Pain Management in the Cognitively Impaired Child

Summary

Acknowledgment

References

Appendix 44.1 Clinical Examples of Postoperative Analgesic Management Strategy

45 Chronic Pain

Chronic Pain in Children

Multidisciplinary Approach

General Approach to Management

Chronic Pain Conditions

Pain Pharmacotherapy

Complementary Therapies

Summary

References

Section X Special Topics

46 Anesthesia Outside the Operating Room

Standards and Guidelines

Off-Site Anesthesia: Structure

Quality Assurance of Anesthesia Services and Outcome in the Off-Site Areas

Anesthesia Versus Sedation for Non–Operating Room Procedures and Tests in Children

Logistics of Managing Acute Emergencies and Cardiopulmonary Arrest Outside the Operating Room

Difficult Airway Management in the Non–Operating Room (Off-Site) Environment

Specific Locations for Non–Operating Room Anesthesia

Summary

Acknowledgment

References

47 The Postanesthesia Care Unit and Beyond

Perioperative Environment

Central Nervous System

Respiratory System

Cardiovascular System

Renal System

Gastrointestinal System

Postoperative Care and Discharge

Beyond PACU: Postoperative Monitoring in the General Care Setting

Acknowledgment

References

48 Sedation for Diagnostic and Therapeutic Procedures Outside the Operating Room

The Evolution of Pediatric Sedation and the Anesthesiologist's Role

Sedation Depth

- Guidelines
- Goals of Sedation
- The Concept of “Safety”
- Specific Sedation Techniques
- Summary and Future of Pediatric Sedation
- References

49 Procedures for Vascular Access

- Venous Cannulation
- Arterial Cannulation
- References

50 Infectious Disease Considerations for the Operating Room

- Causative Agent
- Host
- Methods of Transmission
- Strategy for Preventing Infection Transmission in Health Care Institutions
- Measures for Prevention of Infection Transmission in the Operating Room
- References

51 Pediatric Anesthesia in Developing Countries

- The Child
- Human Resources
- Pathology
- Drugs
- Blood Safety
- Equipment
- Visiting Providers
- Summary
- References

52 Pediatric Equipment

Heating and Cooling Systems
Patient Warming
Intravenous Therapy
Airway Apparatus
Intubation Equipment
Suction Devices
Anesthesia Workstation
Equipment Cart
Defibrillator and External Pacemakers
Ultrasound for Regional Anesthesia and Vascular Cannulation
Monitoring Equipment
Purchasing Anesthesia Equipment
References

53 Simulation in Pediatric Anesthesia

Simulation-Based Training in Anesthesia
What Is Simulation?
Technologies Used in Simulation
Sites for Simulation
Applications of Simulation in Perioperative Pediatric Education
Comparing Traditional Learning With Simulation-Based Learning
Aspects of a High-Fidelity Simulation
What Is a Debriefing?
Using Simulation for Evaluation
Challenges Using Simulation
Future of Simulation
References
