To all respiratory therapists who go beyond the traditional roles of RT and willingly work with other critical care clinicians for better patient care and outcomes. 🍷

—David W. Chang

To my wife, Carolyn, who has supported my writing avocation for over 33 years. 🍷

—Gary C. White

To my wife, Linda, and my children, Alia, Ian, and Adria, who support me with their love. To my past and future students who motivate me to learn. And to my dear Lord Jesus, who makes everything possible. 🍷

—Jonathan B. Waugh

To my amazing “best half,” Diana, a respiratory therapist and great educator who has supported me on every project. To my three princesses, Andrea, Natalia, and Valentina. They know well that this book has been on my bucket list for years. 🍷

—Ruben D. Restrepo

Brief Contents

© s_maria/Shutterstock

- Chapter 1 **Principles of Mechanical Ventilation**
- Chapter 2 **Classification of Mechanical Ventilation**
- Chapter 3 **Modes of Mechanical Ventilation**
- Chapter 4 **Invasive and Noninvasive Airway Management**
- Chapter 5 **Initiating Mechanical Ventilation**
- Chapter 6 **Monitoring in Mechanical Ventilation**
- Chapter 7 **Waveform Analysis and Application**
- Chapter 8 **Management of Mechanical Ventilation**
- Chapter 9 **Critical Care Procedures**
- Chapter 10 **Pharmacotherapy in Critical Care**
- Chapter 11 **Weaning from Mechanical Ventilation**
- Chapter 12 **Neonatal and Pediatric Mechanical Ventilation**
- Chapter 13 **Medical Critical Care Issues**
- Chapter 14 **Traumatic Critical Care Issues**
- Chapter 15 **Critical Care Guidelines and Bundles**

Contents

Preface

How to Use This Book

About the Authors

Acknowledgments

Contributors

Chapter 1 Principles of Mechanical Ventilation

David W. Chang, EdD, RRT

Introduction

Airway Resistance

Factors Affecting Airway Resistance

Airway Resistance and Work of Breathing

Effects on Ventilation and Oxygenation

Waveform Displays

Compliance

Measurement of Compliance

Abnormal Lung Compliance

Plateau Pressure and Peak Inspiratory Pressure

Pressure-Volume Slope

Effects on Ventilation and Oxygenation

Dead Space Ventilation

Anatomic Dead Space

Alveolar Dead Space

Physiologic Dead Space

Ventilatory Failure

Hypoventilation

Ventilation-Perfusion Mismatch

Intrapulmonary Shunting

Diffusion Defects

Oxygenation Failure

Hypoxemia and Hypoxia

Clinical Signs of Hypoxia

Conditions Leading to Mechanical Ventilation

Gas Exchange Abnormalities

- Depressed Respiratory Drive
- Excessive Ventilatory Workload
- Failure of Ventilatory Pump

- Summary
- Case Study
- Bibliography

Chapter 2 **Classification of Mechanical Ventilation**

Gary C. White, MEd, RRT, RPFT, FAARC

Introduction

Physiology of Spontaneous Ventilation

- Inhalation

- Exhalation

- Pulmonary Compliance

- Elastic and Nonelastic Forces of Ventilation

- Equation of Motion of the Respiratory System

Chatburn's Classification of Mechanical Ventilators

- Input Power

- Drive Mechanism

- Pressure Delivery

- Control Circuit

- Control Variables

- Phase Variables

- Conditional Variables

- Output Waveforms

Patient Circuit Design

Summary

Case Study

Bibliography

Chapter 3 **Modes of Mechanical Ventilation**

Gary C. White, MEd, RRT, RPFT, FAARC

Introduction

Spontaneous Ventilation Modes

- Continuous Spontaneous Ventilation

- Continuous Positive Airway Pressure

- Bilevel Positive Airway Pressure

- Pressure Support

- Synchronized Intermittent Mandatory Ventilation

Volume Control Ventilation Modes

- Volume Control—Continuous Mandatory Ventilation

- Volume Control—Synchronized Intermittent Mandatory Ventilation

Pressure Control Ventilation

- Pressure Control—Continuous Mandatory Ventilation

- Pressure Control—Synchronized Intermittent Mandatory Ventilation

Ventilator Targeting Schemes

- Set-Point Targeting

- Dual Targeting

- Biovariable Targeting

- Servo Targeting
- Adaptive Targeting
- Optimal Targeting
- Intelligent Targeting
- Classification of Modes of Ventilation
 - Classification of Volume Control Modes
 - Classification of Pressure Control Modes
- High-Frequency Mechanical Ventilation
 - High-Frequency Jet Ventilation
 - High-Frequency Oscillatory Ventilation
 - High-Frequency Percussive Ventilation
- Summary
- Case Study
- Bibliography

Chapter 4 **Invasive and Noninvasive Airway Management**

Michael W. Canfield, MAEd, RRT, CCT

Introduction

- Airway Management, What It Means
- Causes of Respiratory Failure
- Main Goals of Airway Management

Anatomical Review

- Upper Oral Airway Anatomy
- Lower Airway Anatomy

Noninvasive Airway Management

- Options and Limitations
- When to Transition to Invasive

Invasive Airway Management

- Intubation Kit: The Equipment Needed
- Choosing the ET Tube
- Tube Types
- Blades and Handles
- Macintosh Versus Miller

Intubation Procedure

- Controlled Verses Uncontrolled
- Quick Airway Assessment
- Trouble Signs and Mallampati Score
- Sniffing Position
- Adjunctive Devices Prior to Intubation
- Medications Needed
- Performing the Intubation
- Stabilizing the Tube
- Airway Clearance
- Difficult Airways
- Blind Insertions
- Nasal Intubation
- Complications with ET Tube and Cuff

Ventilating Success

- Signs of Endotracheal Intubation

- Extubation
 - Extubation Criteria
 - Steps for Extubation
 - Signs of Extubation Failure
- Tracheostomy Tubes
 - Variations
 - Dimensions
 - Complications of Tracheostomy
 - When a Tracheostomy Should Be Performed
- Summary
- Case Study
- Bibliography

Chapter 5 **Initiating Mechanical Ventilation**

Jonathan B. Waugh, PhD, RRT, RPFT, FAARC

Introduction

- Purpose of Mechanical Ventilation
- Support Versus Treatment

Causes of Ventilatory Failure

- Hypercapnic Ventilatory Failure
- Hypoxemic Respiratory Failure
- Impending Ventilatory Failure

Goals of Mechanical Ventilation

- Improve Gas Exchange
- Relieve Respiratory Distress
- Improve Pulmonary Mechanics
- Permit Lung and Airway Healing
- Avoid Complications

Assessment of Need for Mechanical Ventilation

- Predisposing Conditions
- Failure of Other Interventions to Avoid Invasive Ventilation
- Contraindications and Patient Advance Directive
- Spontaneous Breathing Parameters
- Blood Gases
- Hemodynamic Measurements
- Pulmonary Mechanics

Protocols

- Evidence-Based Approach and Clinician-Driven Protocol

Initial Settings

- Type of Ventilation
- Mode
- Tidal Volume
- Frequency and Minute Volume

Fraction of Inspired Oxygen

- PEEP
- I:E Ratio
- Flow Pattern

Ventilator Alarm Settings

- Low Exhaled Volume Alarm

- Low Inspiratory Pressure Alarm
- High Inspiratory Pressure Alarm
- Apnea Alarm
- High-Frequency Alarm
- High and Low $F_{I}O_2$ Alarms
- Initial Settings for Special Patient Conditions
 - Advanced Chronic Obstructive Lung Disease
 - Severe Asthma
 - Acute Respiratory Distress Syndrome
 - Cardiogenic Shock and Pulmonary Edema
 - Head Injury
- Summary
- Case Studies
- Bibliography

Chapter 6 **Monitoring in Mechanical Ventilation**

- Lisa A. Conry, MA, RRT
- Monitoring the Ventilator Parameters
 - Peak Inspiratory Pressure
 - Plateau Pressure
 - Dynamic Compliance
 - Static Compliance
 - Flow Delivery
 - I:E Ratio
 - Airway Resistance
 - Auto-PEEP
- Patient Monitoring
 - Chest Inspection
 - Saturation
 - Respiratory Rate
 - Heart Rate
 - Blood Pressure
 - Pulse Pressure
 - Breath Sounds
 - Arterial Blood Gases
 - Transcutaneous Blood Gas Monitoring
 - VD/VT
 - Exhaled CO_2 /Capnography
 - Urine Output
 - Kidney Function
 - Liver Function
 - Nutrition
 - Level of Consciousness
- Critical Care Monitoring
 - Intracranial Pressure
 - Apnea Test
 - Doll's Eyes Test
 - Caloric Test

- Glasgow Coma Scale
- Cuff Leak Test
- Bubble Study
- Hemodynamic Monitoring
 - Arterial Catheters
 - Central Venous Pressure Catheter
 - Pulmonary Artery Catheter
- Hemodynamic Measurements
 - Central Venous Pressure
 - Pulmonary Artery Pressure
 - Pulmonary Artery Occlusion Pressure
 - Cardiac Output (CO) Measurement
 - Cardiac Index
 - Saturation of Venous Blood ($S\bar{v}O_2$)
 - Pulmonary Vascular Resistance
 - Right Ventricular Stroke Work and Index
 - Left Ventricular Stroke Work and Index
 - Systemic Vascular Resistance
- Summary
- Case Studies
- Bibliography

Chapter 7 **Waveform Analysis and Application**

- Ruben D. Restrepo, MD, RRT
- Introduction
- General Concepts
- Scalar Graphics
 - Flow-Time
 - Volume-Time
 - Pressure-Time
- Loops
 - Pressure-Volume Loop
 - Flow-Volume Loop
- Ventilator Mode Recognition
 - Continuous Positive Airway Pressure Plus Pressure Support
 - Volume Control–Continuous Mandatory Ventilation
 - Pressure Control–Continuous Mandatory Ventilation
 - Synchronized Intermittent Mandatory Ventilation
 - Airway Pressure Release Ventilation
- Patient–Ventilator Asynchrony
 - Trigger Asynchrony
 - Flow Asynchrony
 - Cycle Asynchrony
- Summary
- Case Study
- Bibliography

Chapter 8 **Management of Mechanical Ventilation**

David W. Chang, EdD, RRT

Introduction

Fundamental Ventilator Management Strategies

Strategies to Improve Ventilation

Respiratory Frequency

Tidal Volume

Other Strategies to Improve or Sustain Ventilation

Airway Patency and Airflow Resistance

Reduction of Mechanical and Physiologic Dead Space

Permissive Hypercapnia

Strategies to Improve Oxygenation

Ventilation, FIO₂, CPAP, and PEEP

Perfusion

Arterial Oxygen Content

Ventilator Alarms and Events

High-Pressure Alarm

Low-Pressure and Low-Volume Alarms

High-Frequency Alarm

Low-Frequency/Apnea Alarms

High/Low PEEP Alarms

Adjunctive Ventilator Management Strategies

Prone Positioning

Tracheal Gas Insufflation

Mechanical Insufflation-Exsufflation

Acute Respiratory Distress Syndrome

Adjustment of Ventilator Settings for ARDS

Decompensated Heart Failure

Initial Ventilator Settings for Heart Failure

Severe Asthma

Initial Non-invasive Ventilation Settings for Acute Asthma

Initial Ventilator Settings for Acute Asthma

Acute Exacerbation of COPD

Initial Noninvasive Ventilation Settings for Acute Exacerbation of COPD

Initial Ventilator Settings for Acute Exacerbation of COPD

Mass Casualty

Triage Systems for Mass Casualty Incidents

Stockpiled Surge Mechanical Ventilators

Initial Ventilator Settings for Mass Casualty

Summary

Case Studies

Bibliography

Chapter 9 **Critical Care Procedures**

David W. Chang, EdD, RRT

Introduction

Cardiac Monitoring

Types of Cardiac Monitoring

Dangerous Arrhythmias

- Arterial and Venous Access Lines
 - Systemic Arterial Catheter
 - Systemic Venous Catheter
 - Pulmonary Artery Catheter
- Intraosseous Infusion
 - Advantages of an IO Route
 - Technique and Devices to Create an IO Access
- Assisting in Bronchoscopy
 - Indications for Flexible Bronchoscopy
 - Contraindications for Flexible Bronchoscopy
 - Procedure
 - Medications for Flexible Bronchoscopy
 - Bronchoscope and Accessories
 - Placement of Insertion Tube
 - Collection of Samples
 - Complications of Flexible Bronchoscopy
 - Post-bronchoscopy Care
- Mini-bronchoalveolar Lavage
 - Mini-BAL Catheter
 - Insertion of Mini-BAL Catheter
 - Thresholds for Diagnosis of Pneumonia
 - Complications of Mini-BAL
- Chest Tube and Drainage System
 - Indications for Chest Tube
 - Contraindications for Chest Tube
 - Chest Tube Selection and Placement
 - Chest Tube Drainage System
 - Care and Removal of Chest Tube
 - Transport with Chest Tube
- Transport of Critically Ill Patients
 - Adverse Events
 - Indications and Contraindications
 - Equipment and Supplies
 - Types of Transport
 - Procedures for Interhospital Transport
 - Magnetic Resonance Imaging
- Summary
- Case Studies
- Bibliography

Chapter 10 **Pharmacotherapy in Critical Care**

Crystal L. Dunlevy, EdD, RRT

Introduction

Pharmacokinetics

- Absorption

- Distribution

- Metabolism

- Elimination

Pharmacodynamics

- Drug-Drug Interactions
- Drug-Diet Interactions
- Drug Actions
- Drug Delivery
 - Aerosolized Agents (Other Than Bronchodilators)
 - Airway Instillation (Other Than for Advanced Cardiac Life Support [ACLS] Application)
 - Aerosol Delivery in Special Circumstances
- Sedatives/Hypnotics
 - Benzodiazepines
 - Opioids
 - Ketamine
 - Propofol
 - Dexmedetomidine
 - Procedural Sedation and Analgesia
- Analgesia
 - Pain
 - Nonopioid Analgesics
- Neuromuscular Blocking Agents
 - Depolarizing Agent
 - Nondepolarizing Agents
- Reversal and Treatment Agents
 - Naloxone
 - Edrophonium
 - Flumazenil
 - Neostigmine
 - Sugammadex
 - N-Acetylcysteine
- Vasopressors and Inotropes
- Drugs That May Induce Methemoglobinemia
- Prophylactic Drugs
 - Deep Vein Thrombosis
 - Peptic Ulcers
 - Delirium
- Diuretics
- Summary
- Case Study
- Bibliography

Chapter 11 Weaning from Mechanical Ventilation

Jonathan B. Waugh, PhD, RRT, RPFT, FAARC

Introduction

- Defining Weaning, Weaning Success, and Weaning Failure

- Stages of Weaning

- Why Are There Different Methods of Weaning?

Assessment of Readiness

Clinical Measurements as Weaning Predictors

- Ventilation

- Patient Effort and Work of Breathing

- Cardiovascular Sufficiency

- Respiratory Muscle Strength
- Ventilatory Drive
- Oxygenation
- Respiratory Mechanics
- Predicting Weaning Outcomes
 - Success and Failure
 - Sensitivity and Specificity
 - Likelihood Ratio as a Measure of Diagnostic Accuracy
- Pulmonary Measurements
 - Spontaneous Breathing Parameters
 - Frequency/Tidal Volume
 - Static Compliance and Airway Resistance of the Respiratory System
 - Dead Space/Tidal Volume (VD/VT) Ratio
- Traditional Weaning Procedures and Techniques
 - Spontaneous Breathing Trial
 - Removal of the Artificial Airway
 - Failure of SBT
 - SIMV
- Comparison of Weaning Approaches
- Technology to Assist Weaning
 - Modes of Ventilation to Support Weaning
 - Automated Artificial Airway Compensation
 - Artificial Intelligence Systems
- Practices to Enhance Weaning Success
 - Respiratory Muscle Training
 - Interprofessional Collaboration
 - Weaning Protocols
 - Role of Tracheostomy in Weaning
- Causes and Correction of Weaning Failure
- Chronic Ventilator Dependence
- Terminal Weaning
- Summary
- Case Studies
- Bibliography

Chapter 12 Neonatal and Pediatric Mechanical Ventilation

Lisa A. Conry, MA, RRT

Introduction

Anatomical Differences

- Trachea

- Head and Spine

- Airways

- Epiglottis

- Tongue

- Larynx

- Eustachian Tube

- Lymphatic Tissue

- Alveoli

Physiologic Differences

- Distribution of Water
- Bones and Cartilage
- Liver
- Respiratory Rate and Pattern
- Cardiac
- Hormones
- Reflexes
- Temperature Regulation
- Oxygen Consumption
- Airway Resistance
- Blood Volume/Blood Pressure
- Mechanical Ventilation
 - Volume-Controlled Versus Pressure-Controlled Ventilation
 - Indications for Mechanical Ventilation
 - Volume-Controlled Ventilation
 - Pressure-Controlled Ventilation
 - Properties of Humidification
 - Continuous Positive Airway Pressure
 - Intubation
 - Initial Settings—Neonates
 - Surfactant Administration
 - Ventilating the Pediatric Patient
 - High-Frequency Oscillatory Ventilation
 - Neurally Adjusted Ventilatory Assist
 - Extracorporeal Membrane Oxygenation
- Assessment of Oxygenation and Ventilation
- Summary
- Case Studies
- Bibliography

Chapter 13 **Medical Critical Care Issues**

- David W. Chang, EdD, RRT
- Shannon Harris, DNP, FNP, CCRN
- Introduction
- Acute Respiratory Distress Syndrome
 - Criteria and Classification of ARDS
 - Etiology
 - Pathophysiology
 - Clinical Presentations
 - Workup
 - Treatment Algorithm
 - Complications
- Ventilator-Associated Events
 - Ventilator-Associated Conditions
 - Infection-Related Ventilator-Associated Complications
 - Possible or Probable Ventilator-Associated Pneumonia
 - Prevention of Ventilator-Associated Events
- Hypoxic-Ischemic Encephalopathy
 - Etiology

- Principles of HIE
- Cerebral Perfusion Pressure
- Evaluation and Treatment of HIE
- Synopsis of Urgent Medical Conditions
 - Sepsis
 - Acute Hepatic Failure
 - Acute Renal Failure
 - Acute Pancreatitis
 - Acetaminophen Overdose
 - Opioid Overdose
 - Stroke
 - Pulmonary Thromboembolism
- Summary
- Case Studies
- Bibliography

Chapter 14 **Traumatic Critical Care Issues**

Ruben D. Restrepo, MD, RRT

- Chest Trauma
 - Classification of Chest Trauma
 - Diagnosis of Chest Trauma
 - Monitoring of Patients with Chest Trauma
 - Treatment
- Burn and Inhalation Injury
 - Smoke Inhalation
 - Pathophysiology of Inhalation Injury
 - Diagnosis
 - Monitoring
 - Treatment
 - Complications and Prognosis
- Traumatic Brain Injury
 - Classification of TBI
 - Pathophysiology
 - Management of TBI
- Summary
- Case Study
- Bibliography

Chapter 15 **Critical Care Guidelines and Bundles**

David W. Chang, EdD, RRT

- Introduction
- Adult Advanced Cardiovascular Life Support
 - Key Recommendations Based on 2010 AHA Guidelines
 - Key Recommendations Based on 2015 AHA Guidelines
- Crash Cart
 - Airway and Ventilation
- PADIS Guidelines
 - Sleep Disruption
 - Monitoring of Sleep

Ventilation During Sleep

ABCDEF Bundle

Element A (Assess, Prevent, and Manage Pain)

Element B (Both SATs and SBTs)

Element C (Choice of Analgesia and Sedation)

Element D (Delirium Assess and Manage)

Element E (Early Mobility and Exercise)

Element F (Family Engagement/Empowerment)

Nutritional Support Therapy

Nutritional Therapy

Nutritional Bundle Statements

Summary

Case Studies

Bibliography

- Appendix A **Conversion Factors**
- Appendix B **Respiratory Care Calculations**
- Appendix C **CURB-65 Score**
- Appendix D **DRIP Score**
- Appendix E **Multiple Organ Dysfunction Score (MODS)**
- Appendix F **Systemic Inflammatory Response Syndrome (SIRS), Sepsis, Septic Shock, and Multiple Organ Dysfunction Syndrome (MODS)**
- Appendix G **APACHE II—A Severity of Disease Classification System**
- Glossary
- Index
