by the Ministry of Health of Ukraine as a study guide for students of higher
medical (pharmaceutical) educational establishments —
universities, institutes, and academies
(letter № 23-01-25/161 dated 29 June 2011)

Reviewers:

Doctor of Pharmacy, Professor, Head of the Department of Quality Control and Standardization of Drugs of NMAPE named after P.L. Shupyk *N.O. Vetiutneva*;

Doctor of Chemistry, Professor *N.P. Maksyutina*;

Doctor of Chemistry, Professor, Head of the Department of Medical and General Chemistry of NMU named after O.O. Bogomolets *V.O. Kalibabchuk*

Authors of the edition thank the Head of the Department of pharmaceutical chemistry, NFU, Doctor of Pharmaceutical Sciences, Professor V.A. Heorgiyants and her staff for the help in preparation of the manuscript of the study guide “Pharmaceutical chemistry. Analysis of Medicinal Substances according to Functional Groups / O.O. Tsurkan, I.V. Nizhenkovska, O.O. Hlushachenko”

Tsurkan O.O.

Ts82 Pharmaceutical Chemistry. Analysis of the Medicinal Substances according to Functional Groups : study guide / O.O. Tsurkan, I.V. Nizhenkovska, O.O. Hlushachenko. — Kyiv : AUS Medicine Publishing, 2018. — 152 p.

ISBN 978-617-505-628-8

The study guide combines theoretical and methodological specific data for the quality control of pharmaceutical substances.

It is recommended for senior students of pharmaceutical faculties, interns, graduate students of higher medical educational establishments — universities, institutes, and academies. The tutorial will be useful for pharmacists, and analysts-pharmacies and control-analytical laboratories, chemical-pharmaceutical production, because it contains data for the choice of indicators of quality in the formation, and pre-registration testing of analytical regulatory documents.

CONTENTS

Preface	5
Abbreviations	7
Chapter 1. Oxygen-Containing Functional Groups	8
1.1. The Alcoholic Hydroxyl	8
1.2. The Phenolic Hydroxyl	10
1.3. The Enolic Hydroxyl	11
1.4. The Alkoxy and Ether Groups	12
1.5. The Carbonyl Group	13
1.6. The Carboxyl Group	14
1.7. The Ester Group	16
Table I. Methods of Analysis of Oxygen-Containing Medicines.	
Examples of Methods of Use of the Reactions of Preparations	18
Exercises to Consolidate the Material	63
Tests for Self-Knowledge	63
Chapter 2. Nitrogen-Containing Functional Groups	72
2.1. The Amino Group	72
2.2. The Nitro Group	77
2.3. The Amide Group	78
2.4. The Urethane Group	78
2.5. The Hydrazine and Hydrazide Groups	79
2.6. Other Nitrogen-Containing Groups	79
2.6.1. The Azo-group	79
2.6.2. The Azide Group	79
Table II. Methods of Analysis of Nitrogen-Containing Medicinal Substances	80
Exercises to Consolidate the Material	108
Tests for Self-Knowledge	108
Chapter 3. Sulfur-Containing Functional Groups	113
3.1. The Mercapto Group	113
3.2. The Sulfo Group	114
3.2.1. The Amino Methanesulfonate Group	114

3.3. The Sulfamide and Sulfoamide Group	114
Table III. Methods of Analysis of Sulfur-Containing Medicines	115
Exercises to Consolidate the Material	124
Tests for Self-Knowledge	124
Chapter 4. Unsaturated Carbon-Carbon Bonds	126
Table IV. Methods of Analysis of Pharmaceutical Substances Containing Unsaturated Carbon-Carbon Bonds	127
Exercises to Consolidate the Material	131
Tests for Self-Knowledge	131
Chapter 5. Other Functional Groups	133
5.1. The Activated Methyne and Methylene Groups	133
5.2. The Halogen Carboxylic Groups	133
Table V. Methods of Analysis of Medicines Containing Other Functional Groups	134
Exercises to Consolidate the Material	145
Tests for Self-Knowledge	145
Keys for Tests	147
References	148
Index	149
